

FEATURES AT A GLANCE

- For content consumers and contributors using the Internet or intranets
- Publishes Alchemy repositories to the Internet
- Browser-based search and retrieval program
- Highly secure document viewing for PDFs, TIFs, other images and computer report archives
- Global search across many repositories
- Check-in documents to a repository over the Internet

When you have documents that must be accessed by remote users over the Internet or through your corporate intranet, add Captaris Alchemy Web to your Alchemy Server system.

NEW IN ALCHEMY 8.2 WEB CLIENT

- View contents of folders as thumbnails
- Edit document metadata (requires Advanced Server Library Services)
- View AutoCAD files
- Annotate TIF images (requires Advanced Server Library Services)
- View document versions (requires Advanced Server Library Services)

Captaris® Alchemy® 8.2 Web Client

Access Document Repositories over the Web

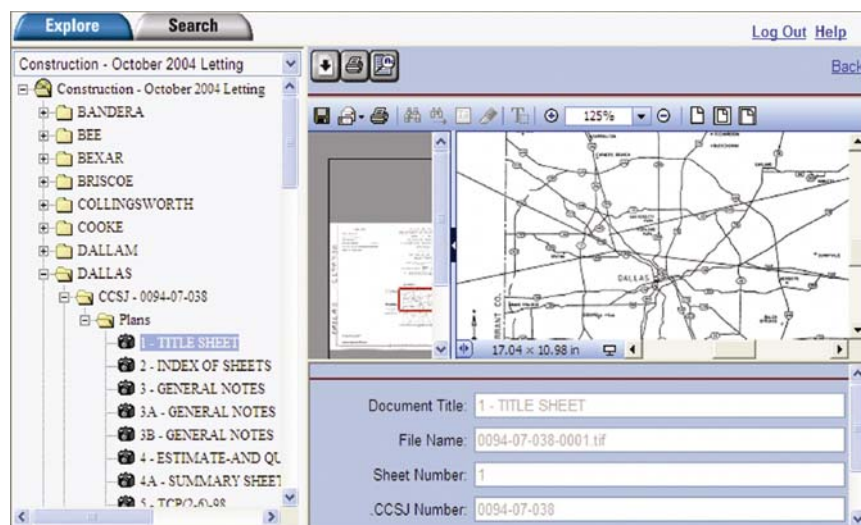

ALCHEMY WEB CLIENT LICENSE ADDS TWO MAIN COMPONENTS TO YOUR SYSTEM

Alchemy Web Engine

Web Engine is the server-side .NET component that manages HTTP access, decides what repositories to publish and determines the settings for end-users. It includes a management console to add or remove repositories. The Web administrator can configure several options for users such as document viewing options, search result list settings and background colors and fonts.

Alchemy Web Client

Web Client is the content consumer interface that runs within Internet Explorer and is automatically published when a user logs in to an Alchemy Web site. It has the same look and feel as the popular Alchemy desktop client, bringing the convenience and power of the classic “three-pane” contextual view pioneered by Captaris to the Internet.

Example of the Three Pane View (Plans Online Web site views are courtesy of the Texas Department of Transportation)

Key features include:

- Classic three-pane contextual view of a repository
- Special Captaris “combo” viewer for TIFs, color images and computer report archives
- Expandable folder view shows where documents are located in relation to the repository
- Combined full-text and metadata queries
- Search across many repositories with one query
- Add files option: upload files to the repository and add index information
- Optional server-based file converter to HTML and GIF
- Send multiple documents as attachments in one email
- Export TIF or text files to PDF (using the Captaris Viewer)

POWERFUL YET SIMPLE QUERIES ACROSS REPOSITORIES

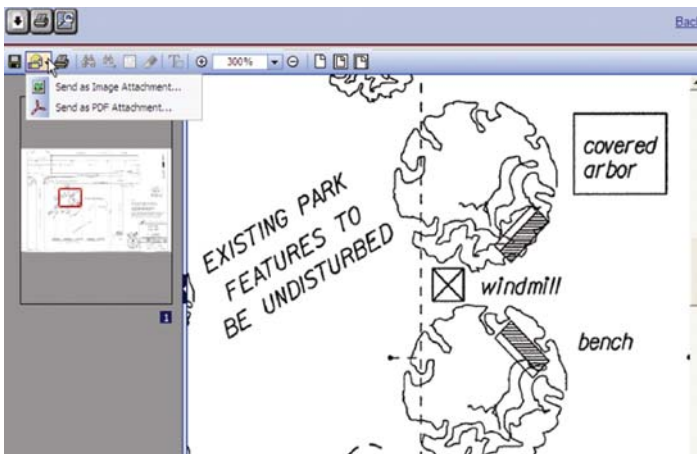

One simple query races across multiple repositories to quickly produce a results list, neatly categorized by repository. Sort the results by title, date or a custom profile field. Then, simply click and view the contents.

UNIQUE “COMBO” DOCUMENT VIEWER

Captaris has developed a very efficient, highly secure and easy-to-use viewer for the Internet. This viewer provides fast and consistent display of TIFs, color image files (JPEG, BMP, GIF, etc.), text files and computer report archive text with overlays—all in one viewer. When a request to access a document is made, it is transmitted to the viewer in a separate encrypted data stream. Documents are not stored as temporary Internet files as with most applications. Once the user moves to a different document or ends the session, the documents are removed from the client machine.

It has several special features, such as the option to save or email the viewed document as a PDF, TIF or HTML file. The viewer also has a full-screen, slide show option to browse quickly through a large image collection.

INTEGRATION WITH OTHER WEB APPLICATIONS

Access Alchemy repositories and content from within other Web applications.

- Execute simple or complex searches from within another Web application and pass them to the Alchemy Web server engine. The search results will be displayed within the Alchemy Web browser.
- Place links to any document in a repository on any Web page. When a user clicks on the link, the document will be downloaded or displayed within the Captaris viewer or opened in a desktop application.
- Place a link to a repository on any Web page. When a user clicks on the link, the Alchemy Web Client is automatically launched displaying the repository.

POPULAR APPLICATIONS FOR ALCHEMY WEB

- Public records access for government entities
- Customer self-service archives
- Construction projects
- Off-site hosting at service bureaus
- Due diligence projects
- Email archive access

ABOUT CAPTARIS, INC.

Captaris, Inc. is a leading provider of software products that automate business processes, manage documents electronically and provide efficient information delivery. Our product suite of Captaris RightFax®, Captaris Workflow™ and Captaris Alchemy is distributed through a global network of leading technology partners. We have customers in financial services, healthcare, government and many other industries, and our products are installed in all of the Fortune 100 and many Global 2000 companies. Headquartered in Bellevue, Washington, Captaris was founded in 1982 and is publicly traded on the NASDAQ Global Market under the symbol CAPA. For more information, please visit www.Captaris.com.
