Captaris® RightFax® Solutions for Financial Services

Automate Processes, Reduce Costs and Speed Customer Transactions with Secure, Electronic Document Delivery

OVERVIEW

Today, financial services institutions are delivering more and more services—from banking and investments to lending and insurance—and competition is greater than ever, making fast and reliable information access even more important. In addition, heightened regulatory requirements such as Gramm-Leach-Bliley and Sarbanes-Oxley, combined with security and privacy concerns are stepping up the pressure for organizations to more effectively exchange information with clients, regulators and business partners. To stay competitive in this aggressive market, financial services organizations need to deliver information more quickly, improve internal workflow processes and enhance communications security—all while reducing costs and providing superior financial services.

RIGHTFAX: FAX SERVER AND ELECTRONIC DOCUMENT DELIVERY SOLUTIONS AT WORK IN FINANCIAL SERVICES INSTITUTIONS

RightFax provides reliable fax server and electronic document delivery capabilities proven to meet the industry's unique information delivery challenges as customers below illustrate.

RightFax Consolidates IT Infrastructure and Supports Disaster Recovery and Compliance

RightFax has been instrumental in consolidating IT infrastructure and supporting compliance for a leading global financial services firm with assets of \$755 billion. This firm processes thousands of transactions, amounting to hundreds of thousands of faxes per month. A merger, combined with integration and regulatory considerations demanded that the firm consolidate its IT infrastructure. As part of these efforts, it replaced its stand-alone machines and its many fax software products with RightFax. By standardizing on a single product to leverage integration and certification efforts across the enterprise, the firm has:

- Increased productivity and eliminated manual processes with delivery features including Least-cost Routing, load-balancing and redundancy
- Expedited its recovery and quickly returned to the business of processing trades within hours after a major disaster
- Complied with Sarbanes-Oxley, the Patriot Act and the Securities and Exchange Commission regulations

“We needed a fax solution that would fit within current regulatory compliance for capturing correspondence and client information and keeping it in an organized, secured manner.”

RightFax Delivers Cost Savings and Productivity

RightFax is also central to controlling costs in the industry. For example, one of the largest commercial grain brokerage firms in the United States uses fax to send commodities information, equities reports and other documents. When the brokerage needed to expand its faxing capacity to accommodate night trading, it replaced its 25 stand-alone fax machines and outsourced services with RightFax. Today RightFax provides a cost-effective, reliable and timely way to meet its high-volume faxing needs, which can reach up to 10,000 pages a day. By using RightFax for document delivery the brokerage has:

- Saved close to half-a-million dollars over the last few years with RightFax. Compared with the brokerage's previous solution, RightFax was \$132,000 less expensive each year—That's a 55 percent savings each year based solely on faxing with RightFax.
- Positioned itself to take advantage of international growth opportunities
- Increased productivity by enabling brokers to send and receive faxes at their desktops

"Our initial RightFax investment has paid for itself over and over again."

RIGHTFAX BENEFITS FOR FINANCIAL SERVICES

With RightFax, organizations have an easy-to-use, easy-to-deploy and affordable method to leverage electronic document delivery in a strategic way:

BENEFITS	OUTCOME
Realize a Quick Return on Investment (ROI)	Reduce document delivery costs up to 90 percent by eliminating the pre-printed forms, postage, labor and equipment costs associated with manual document delivery.
Improve Efficiency and Streamline Business Processes	Extend existing applications with fax server and electronic document delivery to eliminate error-prone, time-consuming and repetitive manual routines that waste time and resources.
Provide Secure Document Delivery	Ensure important financial communications reach their intended recipients with electronic document delivery notifications and options for authenticated and certified delivery.
Comply with Regulatory Mandates	Leverage automated fax to address regulatory concerns, such as Sarbanes-Oxley, Gramm-Leach-Bliley, Payment Card Industry (PCI) and others.
Enhance Customer Service Levels	Expand service offerings and provide immediate information access.
Accelerate the Business Cycle	Provide instantaneous information delivery using fax, email, certified email, encrypted PDF or SMS delivery options to improve response times and accelerate revenue recognition.
Improve Reliability and Disaster Recovery	Use comprehensive backup, fault tolerance and archiving capabilities for reliable disaster recovery and 24x7 up time.
